Cabinetry Proper

Custom cabinetry has evolved beyond the kitchen and bath.

Once limited to functional spaces, it now serves as a defining architectural element throughout the modern home. Our approach embraces this evolution, integrating form, function, and luxury across every room.

Cohesiveness

We design with continuity in mind. Craftsmanship, material integrity, and aesthetic discipline extend from primary spaces into every ancillary area; libraries, home offices, entertainment centers, and integrated storage alike. The result is a unified design language that flows effortlessly throughout the residence.

Personal Luxury

True luxury is personal. It is not found in fixed offerings or predetermined solutions, but in spaces shaped by individual vision and intent. Our process is collaborative and considered, allowing each environment to reflect the client with clarity and precision.

Unconfined

Customization is not a feature, it is the foundation. By removing conventional limitations, we enable a creative partnership rooted in possibility. Working across an expansive range of materials, finishes, and specifications, we deliver cabinetry that is intelligent, expressive, and singular. Every detail is intentional. Every result, enduring.

The CoA Standard

True quality emerges where modern technology meets time-honored principles. CoA creates bespoke architectural cabinetry by uniting advanced manufacturing precision with the irreplaceable soul of human artistry.

Refined by Craft

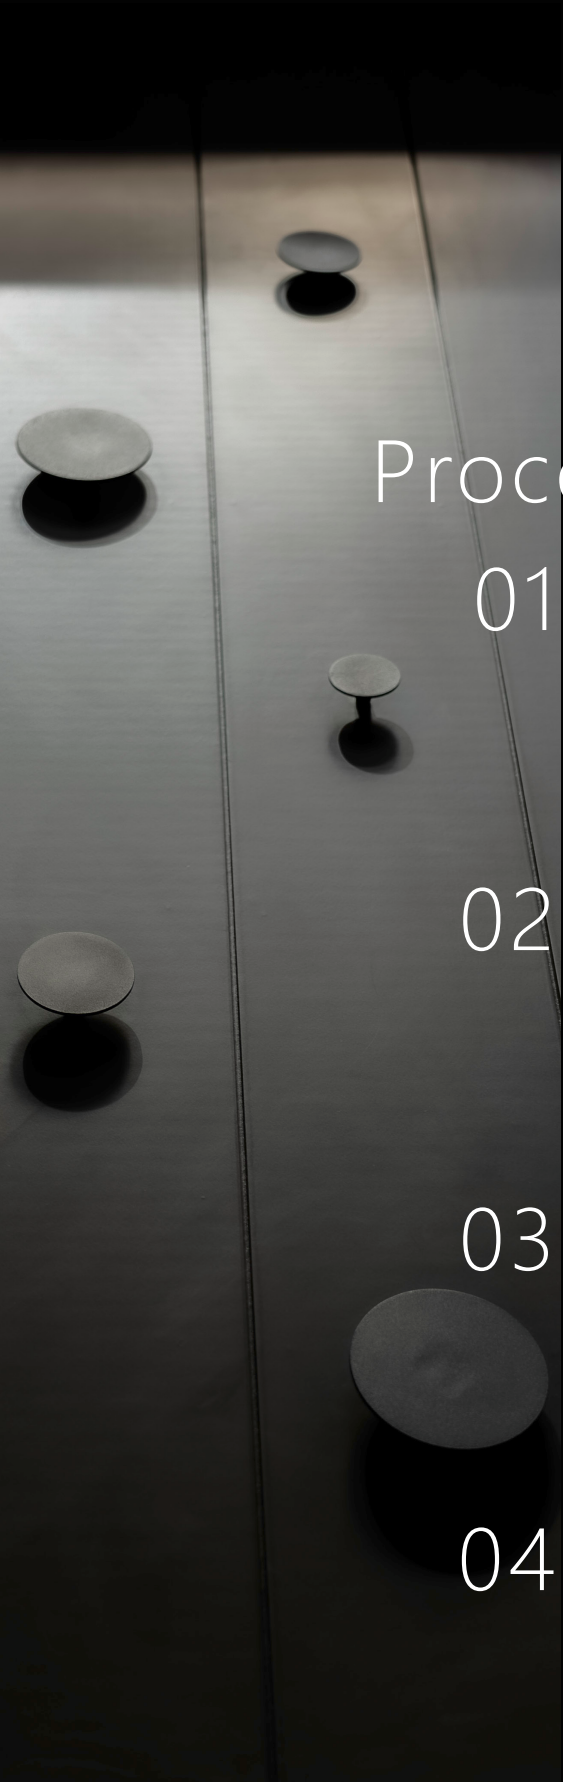

Raw materials elevated into cabinetry through the skill of our artisans.

Honest Materials

High-design complemented by premium materials ethically sourced from domestic suppliers.

Built to Last

Resilient materials crafted to endure.

Process

01 Discovery

We begin every engagement with a listening session, understanding the space, the client, and the life the cabinetry will support, and what's possible.

02 Design

Our designers translate those conversations into precise technical drawings, material selections, and finish specifications.

03 Craft

Each piece is built by hand in our workshop — no shortcuts, no compromises on joinery, hardware, or finishing.

04 Install

Our installation team treats the final placement with the same care as the build — ensuring every piece sits exactly as intended.

Material

Every CoA cabinet begins with a deliberate material decision. Case and face materials are specified independently, allowing structural and aesthetic choices to work in concert.

**Additional species and surface applications available upon consultation.*

Case

Baltic Birch

UV2 Baltic Birch
(UV-coated for interior visibility)

Face

Wood Species

Cherry

Hickory

Maple

Red & White Oak

Surface Application

Acrylic Panel

Wood Veneer

High Pressure Laminate

Thermally Fused Laminate

Finish

CoA finishes are of the highest quality, applied by hand, and specified to the material. Every color, sheen, and application method is selected in collaboration with your designer to ensure the result integrates precisely with your space.

**Finish samples available upon request. Final selections recommended on physical material.*

Paint

Matte | Satin | Gloss

Pure White

Dover White

French Grey

Iron Ore

Tricorn Black

Custom

Stain

Matte | Satin | Gloss

Natural

Medium

Dark Ebony

Custom

Fronts

Cabinet fronts define the visual character of the space. CoA offers a range of door styles and configuration methods, each selected in collaboration with your designer to suit the architecture of your home.

**All styles are available across configuration types. Custom profiles available upon consultation.*

Styles

- Mission
- Quincy
- Shaker
- Slab
- Tambour
(reeded, flexible panel)

Configuration

- Full-Overlay
- Partial Overlay
- Inset

Features

Every CoA cabinet is built to perform as precisely as it looks. Hardware, joinery, and construction method are specified to the project — selected for longevity, function, and the demands of the space.

**All hardware and joinery specifications are confirmed during the design phase. Custom configurations available upon consultation.*

Lighting & Extras

Built-in LED lighting
Fold-away steps
Custom Inserts and Pullouts
Charging Stations

Hardware

Adjustable Self Close Hinges
Soft Close Drawer Slides
Integrated Pulls Available
Push To Open

Cabinet Case

Framed
(traditional face frame construction, defines the cabinet's visible border)
Frameless
(full-access European construction, clean flush exterior)

Joinery

Dovetail Drawer Boxes
Mortise and Tenon

Start Planning

A consultation with CoA is where the project takes shape — where your space is understood, your standard is established, and the full range of possibility is laid out. Everything after follows from that conversation.

Schedule a consultation to begin.
